-

INDUSTRY EXPERIENCE

Kush Monsters - Detroit, MI

6/2016-Present

Certified Medical Marijuana Caregiver

Coordinate and supervise the production of high quality medical cannabis in a 3000 sq. ft. facility with 40 lights and over 70 total plants in a "sea of green" environment. Plan and implement successful strategies to streamline cultivation processes and achieve continually increased yields of up to 1.25 pounds per light (12-16 ounces per plant). Train, mentor, and supervise a team of 2 assistant growers and oversee plants throughout the entire rooting, vegetative, and flowering phases. Responsible for all aspects of grow room set up, lighting, climate control, cloning and propagation, soil and nutrient mixtures, watering and irrigation, pest control, defoliations, harvesting, trimming, curing, and quality control. Consistently comply with security protocols as well as various regulatory standards and guidelines. Utilize IT systems to maintain accurate records and documentation. Assist with sales and communicate effectively with local dispensary representatives in order to promote products.
